## Career Objective

---

Deeply passionate about software development, I am looking for a work environment that values continuous learning and provides opportunities to make meaningful contributions. I am interested in immersing myself in the realm of full stack development, crafting efficient and reusable systems tailored to power intricate web applications.

## Experience

---

### **FULL STACK DEVELOPMENT**

**Cinemattflicks:** A **RESTful API** and its corresponding client-side created from scratch. The backend architecture includes an authentication method using **JWT (JSON Web Tokens)** to ensure communication between the client and the server. This project provided me the opportunity to hone in on my problem solving skills as I tackle challenges ranging from database schema design to API endpoint management. Using newer technologies to expedite time savings of 20%.

**Chatter:** An project centered around a real-time chat mobile app build with **React Native**, utilizing **Firestore** for its **real-time database** capabilities. I implemented the **WebSocket protocol** to enable seamless communication in chatrooms for friends and families, demonstrating my ability to create a responsive and interactive mobile applications using **JavaScript**.

**Meet App:** A serverless and **progressive web application** (PWA) that utilizes a **test driven development** (TTD). This app fetches events from the **Google Calendar API** to inform users of upcoming events from a selected location and uses **OAuth** as its user authentication method. The app uses **AWS Lambda FaaS**.

## Skills

---

- **Languages:** JavaScript | TypeScript | HTML | CSS | SCSS | Node.js | JSX
- **Frameworks/Libraries:** React | React Native | Bootstrap | PropTypes | jQuery | Express.js | Jest
- **Packaging:** Parcel | Babel
- **Environments:** VSCode | Git | GitHub | Atatus | Postman
- **Hosting:** Heroku | Netlify | GitHub Pages
- **Methodology:** Agile | Kanban | Notion | TDD | BDD
- **Databases:** MongoDB (noSQL) | pgAdmin4 (SQL) | JSON | Firebase/Firestore
- **Hands on experience:** AWS (Lambda) | AJAX (Asynchronous programming) | layouts (CSS Grid, Flexbox) | animations | CORs (Cross-Origin Resource Sharing) | authentication & authorization | data encryption | web accessibility | TTD (Test-driven Development) | PWA (Progressive Web Application) | CI (Continuous Integration) | Gherkin | OOP (Object Oriented Programing)

## Education

---

### **CAREERFOUNDRY - FULL STACK DEVELOPMENT**

**Graduation: June 2024**

- 900+ hours of hands-on technical experience for Full Stack Web Development
- One-on-one meetings and professional mentorship for every project
- Completed [Front End Development](#) Course
- Completed Full Stack Immersion Course

### **University of Nevada Las Vegas**

- Hospitality administration/management

**Graduation: May 2021**

### **Silverado High School**

- Honors Advanced Diploma

### **LANGUAGES**

- Vietnamese
- English

### **OTHER WORK EXPERIENCES:**

- TAO Hospitality - 3 year  
(Maitre D)

- WAKUDA 2 Michelin Star: 2 years  
(Lead Hostess)
